As a participant

... take part in offers from the digital world throughout Bavaria

... find out more on our homepage.

... discover a workshop for you (face-to-face or online)

.. sign up and have fun

Join in!

This is Code Week Bavaria!

Together, we initiate Bavaria-wide
Events as part of Code Week

In 2022, MINT-Labs Regensburg e.V., together with Deggendorf University of Applied Sciences, closed the previously large gap in the digital landscape and founded Code Week RegioHub Bayern. Its task is to initiate events throughout Bavaria that are intended to bring young people closer to the digital world.

The code week is a grassroots movement. It has been around since 2013 and takes place every year in October. Associations, initiatives, universities, libraries and many more people organize digital offers for you: you can use them for free. Whether you write program codes or draw digitally, there's something for everyone.

Come by and find your digital event:
